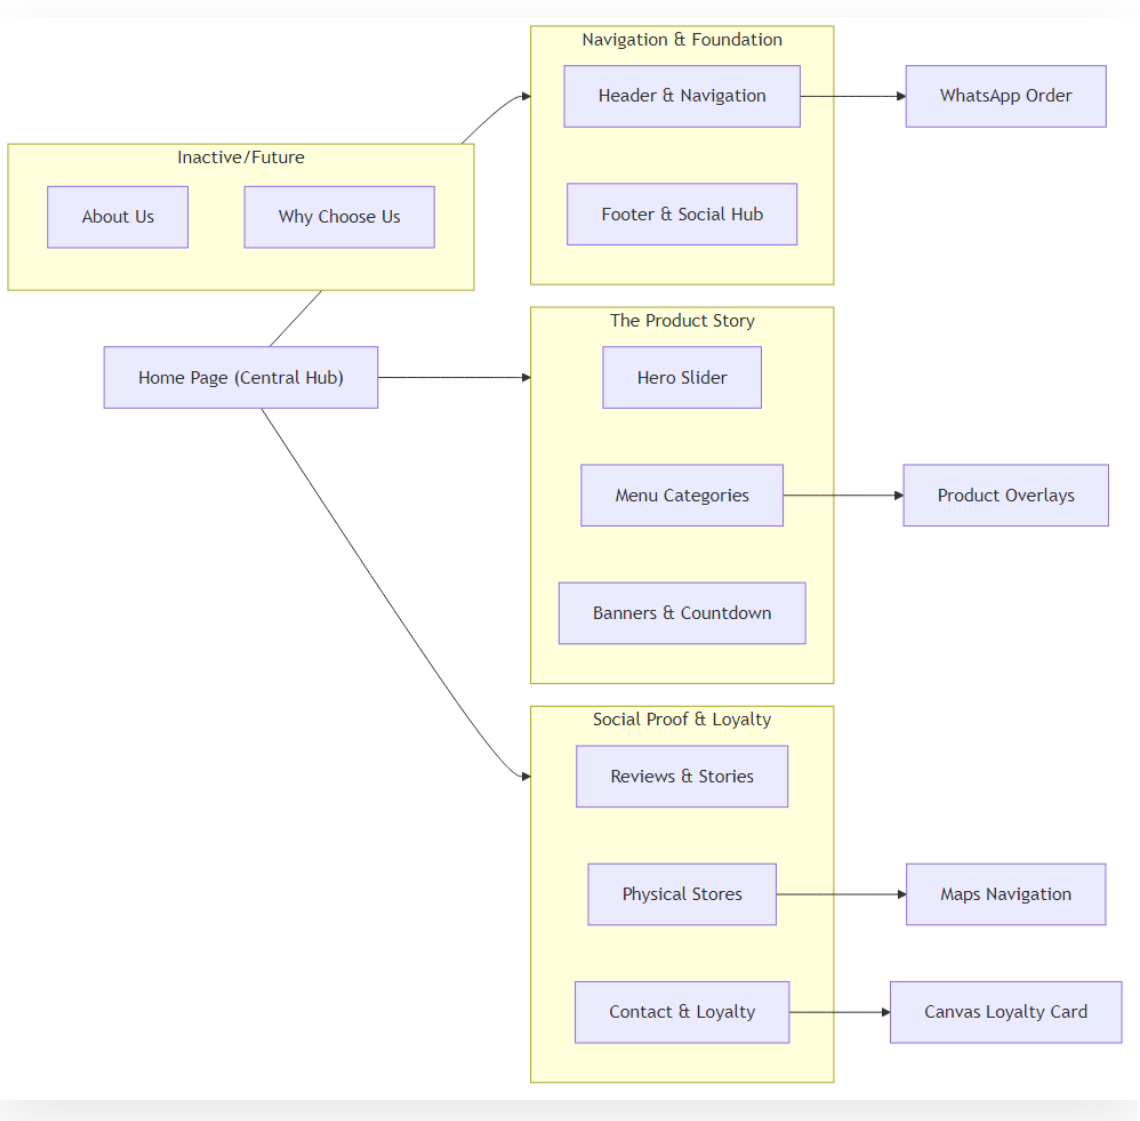
2Go Website Project Documentation

This document provides a comprehensive overview of the **2Go Fresh Beverage Brand** website, including its architecture, user journey, and design philosophy.

🗺️ Visual Sitemap



🏗️ Sitemap & Architecture

The website is a premium **Single Page Application (SPA)** built with Next.js, optimized for high-conversion and visual storytelling.

1. **Header** (Global Controller)

Integrated WhatsApp and Direct Call buttons for frictionless ordering, with a smooth glassmorphism transition on scroll.

2. **Hero Section** (Brand First Impression)

Features a dynamic parallax slider with floating assets to communicate freshness immediately.

3. **Categories** (Menu Engine)

An interactive grid allowing users to filter products instantly. Detailed product overlays provide more info without leaving the search flow.

4. **Banners** (Conversion Utility)

Highlights special deals with live countdowns to create excitement and urgency.

5. **Reviews & Social Proof**

A vibrant wall of customer stories and video-style segments to build trust and community.

6. **Locations & Contact**

Clean, interactive store cards linked to navigation, alongside a loyalty-driven contact hub.

🚶 User Journey

Phase 1: High-Impact Entrance

The user is greeted by the brand's premium aesthetics. Floating bottles and vibrant colors communicate "Freshness" within seconds.

Phase 2: Menu Discovery

Users browse the menu categories. Interactive filters and sleek product overlays make exploring the menu feels smooth and high-end.

Phase 3: Selection & Urgency

Social proof (Reviews) builds trust, while the limited-time banners drive them toward a decision.

Phase 4: Direct Conversion

A single click connects the user to WhatsApp or a direct call, streamlining the ordering process for high efficiency.

Phase 5: Enrollment & Rewards

After ordering, users can join the loyalty circle to receive a personalized digital membership card instantly.

⚙️ Core Functionality & Logic

1. Seamless Asset Delivery

The system ensures that all high-resolution imagery and brand assets load perfectly across all devices and hosting platforms, maintaining a premium look at all times.

2. Personalized Loyalty Engine

A custom engine that generates and personalizes digital loyalty cards in real-time, providing users with a tangible sense of belonging post-purchase.

3. Immersive Interactive Flow

Fluid animations and reactions throughout the site guide the user's journey, making the digital experience feel as tactile and premium as the beverages themselves.

4. Real-time Offer System

Dynamic countdowns and live data reflect current store offerings, keeping the content fresh and relevant for returning visitors.

🎨 Design System & Styles

Colors

Token	HEX	Preview	Role
Primary	`#d64c4c`		Signature Red (Energy, Fruit)
Secondary	`#307351`		Forest Green (Natural, Health)
Yellow	`#F3CA40`		Honey Yellow (Zest, Deals)
Dark	`#1a1a1a`		Premium Contrast (Luxury)

Typography

- **Urbanist**: Used for all weights (300-900). Geometric sans-serif that reflects cleanliness and modern beverage branding.
- **Noto Sans Bengali**: Perfect local integration without sacrificing style.

Visual Pillars

- **Glassmorphism**: Layers of depth using blur and transparency.
- **Organic Depth**: Shadowing that makes digital elements feel like physical objects.
- **Micro-Animations**: Subtle movements that make the site feel responsive and alive.
